Grange operations continue safely achieving over 630 days lost time injury free.

Movement rates in the mine have been lower than planned due to some issues with wall instability and wet weather in the last quarter. Plans have been developed to address these areas and work is continuing to improve mining efficiency in North Pit. South Deposit pit continues to deliver high grade mill feed, as we mine the lower parts of the pit. Weight recovery has increased in the quarter as high grade ore is mined from the lower parts of the ore body in South Deposit.

Planning and preparation work continues for the replacement of the second Autogenous Mill which will commence at the end of Q1 2017. Construction of the South Deposit Tails Storage Facility (SDTSF) continues to progress on plan.

The average price received during the quarter was US\$88.45/t (A\$118.86/t) (FOB Port Latta), up approximately 13.3% (15.1%) from US\$78.07/t (A\$103.32/t) in the June 2016 quarter.

This upward movement in prices from the previous quarter reflects an increased demand for Grange's high quality, low impurity products, which has resulted in the pellet premium strengthening in Q4 2016. Whilst there is uncertainty to the future direction of the iron ore prices, Grange is confident that the market will continue to recognise a premium for higher quality pellets in comparison to benchmark 62% Fe iron ore products.

Grange will continue to deliver into secured term offtake agreements for all products for 2017.

SOUTHDOWN MAGNETITE PROJECT (Grange 70%, SRT Australia Pty Ltd 30%)

All tenements, permits and project assets continue to be maintained in good order. Budgeting and cost control over expenditure on this project continues to secure the investment.

The Joint Venture Partners continue to monitor all ongoing project requirements to ensure that the current status of the feasibility studies allow the full recommencement of the project once Grange is able to secure an equity partner for a strategic share of the Company's interest in the project.
