

REPORT FOR THE QUARTER ENDED 31 MARCH 2004

HIGHLIGHTS

Financial

- Cash and receivables at the end of the quarter totalling \$13.44 million.

Mt Windsor Joint Venture

- 19,522 tonnes of copper concentrate containing 24.71% copper and 0.8 g/t gold produced from the Reward Deeps project.
- The Company's fourth shipment (9,991 tonnes) of copper concentrate from the Reward Deeps project exported from Townsville on 25 March 2004.
- Proceeds of \$5.52 million received during early April 2004 from the sale of the March 2004 shipment of copper concentrates.
- Extension of the Reward Deeps decline commenced to provide access to the Lower Reward Deeps resource below the 100mRL level.
- Underground diamond drilling programmes to increase resource base commenced during April 2004.

Freshwater

- Mining undertaken from the Plutonic East underground mine and the Callop open pit during the quarter.
- Royalty payments of \$50,922 generated during the quarter.
- Encouraging drill results (**including 2.6m @ 96.2g/t Au, 2.1m @ 75.9g/t Au, 1.15m @ 136.4g/t Au, 7.3m @ 18.8g/t Au and 3.85m @ 22.5g/t Au**) recorded from the Plutonic East underground mine in the Freshwater leases.
- Very encouraging drill results (**including 14m @ 4.9g/t Au, 9m @ 7.2g/t Au, 14m @ 4.1g/t Au, 7m @ 7.4g/t Au, 3m @ 15.8g/t Au and 10m @ 4.6g/t Au**) recorded from an extensive development drilling programme at the Salmon gold prospect in the Freshwater leases.

Red Hill

- 548,308 tonnes of ore grading 1.65g/t gold mined from M27/57.
- 15,464 ounces of gold recovered from the processing of 297,655 tonnes of ore grading 1.68g/t.
- 67,076 ounces of gold produced from M27/57 since mining commenced in February 2003.
- Royalty payments to Grange due to commence during the September 2004 quarter.

Southdown Magnetite Project

- Evaluation of the project has commenced.
- Ground magnetic and gravity surveys planned to commence in May 2004.

Wembley Project

- Gleneagle Gold plan to commence RC drilling in May 2004 at the Durack and Outback gold prospects.

MINING & EXPLORATION ACTIVITIES

MT WINDSOR JOINT VENTURE

(Grange Resources Limited (“Grange”) 30%
Thalanga Copper Mines Pty Ltd (“TCM”) 70%)

Reward Deeps and Conviction Project

During the March 2004 quarter 203,449 tonnes of ore grading 2.81% copper were processed through the Thalanga plant for the production of 19,522 tonnes of copper concentrate containing 24.71% copper and 0.8 g/t gold. Copper recovery and concentrate grade were below budget for the quarter primarily due to variable head grade and higher than expected zinc values in some of the ore processed.

Ore production for the quarter was 187,604 tonnes with approximately 85% of the ore being mined from Reward Deeps, 10% from Conviction and 5% from the Hanging Lens. The grade of ore from the Reward Deeps sub level cave was lower than expected due to dilution from the stope walls. Mining from the sub level cave has now been completed and the remainder of the Reward Deeps ore body is being mined by conventional stoping. Production from Conviction was limited due to backfilling operations during February and March. Production from Conviction recommenced towards the end of March with high-grade ore being mined.

A summary of the production statistics for the Reward Deeps project for the March 2004 quarter and project to 31 March 2004 is presented in Table 1.

TABLE 1					
MT WINDSOR JOINT VENTURE					
REWARD DEEPS PROJECT – PRODUCTION STATISTICS					
	June 2003 Quarter	Sept 2003 Quarter	Dec 2003 Quarter	March 2004 Quarter	Project to 31.3.04
Ore Mined (tonnes)	191,695	177,330	228,517	187,604	987,539
Ore Milled (tonnes)	142,470	201,951	228,265	203,449	959,873
Head grade – (Cu %)	3.81	4.72	4.60	2.81	4.16
Copper Recovery (%)	89.36	89.88	88.94	83.46	89.21
Concentrates Produced (t)	17,781	31,807	34,235	19,522	133,902
Concentrate Grade					
- Copper (%)	27.28	27.04	26.11	24.71	26.62
- Gold (g/t)	0.8	0.8	0.8	0.8	0.8
- Silver (g/t)	17	17	17	17	17

The Company’s fourth shipment of concentrate (9,991 tonnes) from the Reward Deeps Project was exported from Townsville on 25 March 2004. Proceeds of \$5.52 million were received during early April from the sale of this shipment of copper concentrate. The Company’s fifth shipment of approximately 10,000 tonnes of concentrate is scheduled for export from Townsville during July 2004.

Lower Reward Deeps Project

During March a study was commenced to evaluate the feasibility of mining the Lower Reward Deeps resource below the 1000mRL level. The study was completed during April and showed that the project was financially viable. Extension of the existing decline from the 990mRL level to 940mRL commenced during April. Development drives are planned at the 970mRL and 940mRL levels with retreat uphole benching proposed as the mining method.

Underground diamond drilling designed to locate additional resources commenced during April 2004.

Exploration (Grange 30%, TCM 70%)

Underground Diamond Drilling

An underground diamond-drilling programme designed to test several targets within 200 metres of the Reward Deeps decline has been designed and is planned for the June 2004 quarter. The objective of the programme is to locate additional resources to extend current mine life.

Exploration EPM 3380

Follow up drilling at the Truncheon prospect to investigate off hole conductors recorded during previous down hole EM surveys is scheduled to commence during the June 2004 quarter.

FRESHWATER (Barrick Gold of Australia Limited (“Barrick”) 100%, Grange - Production Royalty)

Barrick has provided the following information on activities relating to the Freshwater project during the March 2004 quarter.

Operations

During the quarter underground mining continued at the Plutonic East Mine with a total of 510 metres of development on the 15 to 17 levels and the 20 to 22 levels. Production from the Freshwater section of the mine was 11,242 tonnes of ore grading 7.65g/t gold.

Production details for the Plutonic East mine to the end of March 2004 are summarised in Table 2.

TABLE 2
FRESHWATER PROJECT – PLUTONIC EAST MINE
SUMMARY OF ORE PRODUCTION TO 31 MARCH 2004
(Ore tonnes > 1.5g/t Au)

Period	Tonnes	Grade (g/t Au)	Royalty (\$)
December 2001 to 30 June 2002	20,865	5.05	25,243
September 2002 Quarter	21,941	7.73	105,626
December 2002 Quarter	12,228	7.54	55,680
March 2003 Quarter	16,729	6.78	59,150
June 2003 Quarter	6,624	4.04	6,800
September 2003 Quarter	6,057	4.01	12,136

Development Drilling

Underground diamond drilling was undertaken at Plutonic East during the quarter with 40 holes aggregating 777 metres being completed. All drilling was undertaken as grade control of known lodes in preparation for stoping. Significant assays are summarised in Table 4.

TABLE 4 FRESHWATER LEASES - PLUTONIC EAST MINE SIGNIFICANT DRILL INTERSECTIONS (>5g.m/t)

				29.55	1.15	3.05

During the quarter 141 Reverse Circulation (RC) holes (15,907 metres) were drilled at Salmon, 10 RC holes (421 metres) at Catfish and 8 RC holes (356 metres) at Dogfish.

Significant drill intersections (>10g.m/t) from the drilling programme at Salmon are summarised in Table 5.

Exploration

No exploration activities were carried out within the Freshwater tenements during the March 2004 quarter.

RED HILL (Mining Lease M27/57) (Placer Dome Asia Pacific ("PDAP") 100%, Grange 4% Gross Revenue Royalty)

Grange holds a 4% gross revenue royalty on all production after the first 85,000 ounces of gold produced from the Red Hill mining lease M27/57, which is located approximately 4 km north east of the Kanowna Belle Gold Mine owned and operated by PDAP.

PDAP has advised that mining operations continued at Red Hill during the March 2004 quarter. Total mined ore production from within M27/57 for the quarter was 548,308t @ 1.65 g/t. A total of 318,243t was hauled to the Paddington processing plant during the quarter.

297,655 tonnes at a grade of 1.68g/t were processed during the quarter, producing some 15,464 ounces of recovered gold.

Total reconciled mined ore production from commencement of mining (February 2003) until 31st March 2004 is 1,388,218t @ 1.52gt. Total dry tonnes hauled during this period were 1,087,070t and ore processed 1,045,435t @ 1.49g/t.

Total gold produced from the current operation and the trial pit within M27/57 amounts to 67,076 ounces. Based on the current mining schedule it is estimated that royalty payments to Grange should commence during the third quarter of 2004.

During the quarter six geotechnical diamond drill holes were completed and the results are being interpreted by the geotechnical team to validate optimal pit designs.

A Resource and Reserve model review has commenced and is currently being evaluated against a 200,000 tonne Red Hill ore mill trial which commenced late March and is due for completion mid-April. The results of the trial are expected to validate and improve the techniques used for Resource, Reserve and Grade Control modelling.

The mill trial is also being used as part of a Mine to Mill continuous improvement process.

SOUTHDOWN MAGNETITE PROJECT (Grange 100%)

The Southdown Magnetite Project is located approximately 90km northeast of the Port of Albany on the south coast of Western Australia. The project comprises three granted mining leases covering an area of approximately 1700 hectares on freehold farming property. The leases contain magnetite mineralisation within a banded quartz-magnetite gneiss that ranges in thickness from 50 to 100 metres in the portion of the deposit that has been previously drilled.

Grange is currently evaluating the project to assess its viability. Detailed ground magnetic and gravity surveys are planned to commence during the third week of May 2004. The results of this work will be used to determine the structure and extent of the deposit and assist in planning a follow up programme of diamond drilling to evaluate the size and grade of the resource.

Several expressions of interest have been received from other parties regarding the future development of the project.

WEMBLEY

(Grange 100%, Gleneagle Gold Limited (“Gleneagle”) Option to earn 80%)

The Wembley Gold Project is located approximately 65km south east of Gleneagle’s Fortnum Gold Project and comprises one granted mining lease and a mining lease application. The granted mining lease covers the Durack and Outback prospects, which host a resource of 557,000 tonnes grading 2.18g/t gold (39,000 contained ounces). Gleneagle has an option to earn an 80% interest in the tenements by spending \$500,000 on exploration.

Gleneagle has advised that RC drilling to assess the geometry, grade and size potential of near surface mineralised zones within the Durack and Outback prospects, plus strategic deeper RC drilling to test interpreted high grade zones at depth is due to commence during the first week of May 2004. Further definition of the near surface mineralised zones has the potential to enhance the defined resource and as such these zones represent priority drill targets.

Unless otherwise stated, technical information in this report on mining activities is based on, and accurately reflects, information compiled by Mr Alex Nutter, a full time employee of Grange Resources Limited who is a member of The Australasian Institute of Mining and Metallurgy and the Australian Institute of Geoscientists with more than 5 years experience in the field of activity in which he is reporting.

ALEX NUTTER

Technical Director

ON-MARKET SHARE BUY-BACK

On 30 January 2004 the Company completed an on-market share buy-back, conducted over a six month period. Pursuant to the on-market share buy-back, the Company bought back 1,366,677 shares for a total consideration of \$450,700.49. During the buy-back the lowest price paid was 28.00 cents and the highest price paid was 52.00 cents.

CASH POSITION

During the March quarter, the Company's fourth shipment of copper concentrate from the Reward Deeps project was exported from Townsville with the proceeds of \$5.497 million received in early April. Mining operations at the Reward Deeps and Conviction underground mines continued throughout the March quarter. As a consequence of these operating activities the Company recorded a positive cash flow of \$2.460 million. The Company recorded a modest cash flow deficit from financing activities which was largely attributable to the completion of the on-market buy-back of shares during the quarter. The resulting cash balance at 31 March 2004 was \$6.658 million.

The Company expects the fifth shipment of copper concentrate from the Reward Deeps Project to be exported from Townsville during July 2004.

Compliance statement

- 1 This statement has been prepared under accounting policies which comply with accounting standards as defined in the Corporations Act or other standards acceptable to ASX (see note 4).
- 2 This statement does give a true and fair view of the matters disclosed.

Sign here: Alec Pismiris
 (Company secretary)

Date: 30 April 2004

Notes

- 1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- 2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, *AASB 1022: Accounting for Extractive Industries* and *AASB 1026: Statement of Cash Flows* apply to this report.
- 5 **Accounting Standards** ASX will accept, for example, the use of International Accounting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
